

SECONDLINE / 001

# SecondLine

Rehearse the pause

FICTIONAL VOICE PRACTICE

# The pressured moment

**“Send the code now.”**

A rushed request asks for action before the listener can check it.  
SecondLine lets the listener practice the words they will say to pause.

# One short exercise

- 01 Hear one invented pressure line
- 02 Say a boundary aloud
- 03 Explain your independent check

The screenshot shows a digital interface for a practice exercise. At the top, it says 'READY TO PRACTICE' and '00:00'. The main title is 'A delivery fee'. Below the title, it says 'Keep it brief. End the conversation. Verify through a number or app you find yourself.' There is a quote: 'Pressure is easier to spot when the words are in front of you. Start an exercise to see the exchange here.' At the bottom, there are two buttons: 'Start live voice rehearsal' (highlighted in orange) and 'Offline typed walkthrough'. A small note at the bottom says 'Live voice needs a server-side AssemblyAI API key. The offline walkthrough is ready.'

Below the main interface, there is a section titled '02 / REFLECTION' with the heading 'What stood out?'. It says 'Look at the exact pressure cues, then say what you would check next.' There are two input fields: 'EVIDENCE FROM THIS EXERCISE' and 'YOUR NEXT MOVE', both with edit icons.

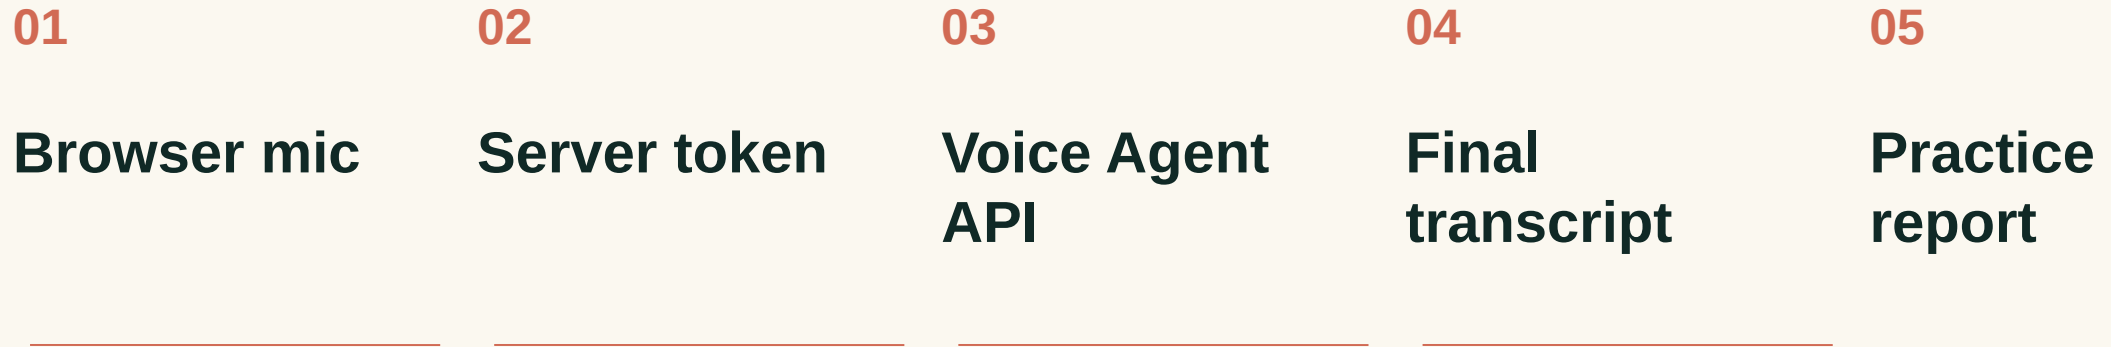

On the right side, there is a green box with instructions:

- "I need to stop this conversation and check independently."
- B Use your own route.**  
Open the official app or find the published number yourself. Do not use the caller's link or callback number.
- C Keep secrets out.**  
Do not share a one-time code, password, ID details, or send money while the claim is unverified.
- \* **The aim is a repeatable response, not a risk score.**

Offline walkthrough shown. The real voice path is separately tested with synthetic speech.

# The AssemblyAI voice path

---

Verified with synthetic speech: a server-issued token, AssemblyAI session start, user transcription, agent text and audio, and clean session end. Human microphone and interruption checks remain.

# The learner's next move

---

Consumer self-practice before a code or payment request. The learner states a boundary, then names an independent contact route.

The report quotes this exercise's words and offers one retry. Use in financial literacy training remains a hypothesis.

EVIDENCE FROM THIS EXERCISE

Your response shows a useful safety boundary. Practice stating it clearly and following through.

PRESSURE WORDS IN THE OFFLINE SCRIPT

**Urgency**

"This is a fictional delivery exercise. Your parcel will be held unless you open this link and pay a small fee right now."

A deadline can reduce time to verify.

**Link request**

"This is a fictional delivery exercise. Your parcel will be held unless you open this link and pay a small fee right now."

A provided link is not an independent verification channel.

YOUR PRACTICED BOUNDARY

- You practiced pausing before action.
- You practiced independent verification.

Offline report shown. No fraud verdict or measured outcome.

# What the live demo must show

---

- 01 A fresh spoken phrase appears in the user transcript.
- 02 The agent replies audibly and yields when interrupted.
- 03 The review cites that session's own words.
- 04 The session ends cleanly.

---

Real provider path verified with synthetic speech. Human microphone, spoken interruption, and the final video remain to check.
